Unfortunately fate degreed, that we did not get aquainted personally, but I may look you up hopefully perhaps in the next year. What drives me to write to you, is the request, to find for me a specimen, regardless how incomplete, of your not described Chilopsis glutinosa, Engl., in Wislizen 10. ednot. I am at present revising its genus, and would not have bothered you, if Asa Gray had not written, that he did not have a specimen of your plant, thus, could not furnish anything.

In for my part, I have let the cacti fall, if not in the future everything will become so unitelligible as the hieroglyphs were before the finding of the Rosati stone.

If you get something worthwhile to know, please send me information for the (name of a publication, E.D.) Kreplands ????, a few lines will always be most welcome.

All Europe wonders about the spirit in the United States. Spain takes Santo Domingo and the speculators in the Westindies want to try to grab Braunsville, if it should get to land fighting with you, so that nothing is missing. But, when the Civil War is over, the participants will learn to their damage, that they will be in as bad a spot with their cottom as Russia was after the Krimm War with their hemp and tallow. The hemp had come from East India, and was found better and stronger than the Russian, the tallow was replaced by plant juices of african Nagor and asiatics from Elaëis and Cocos. But, one hopes here, that it will not come to the wordt and that is also my wish.

With colleagual (no such word) E.D.) greetings,

Most devoted Your Berthold Seemann

* is this the "Niger" of Bird-food fame ED. 2.

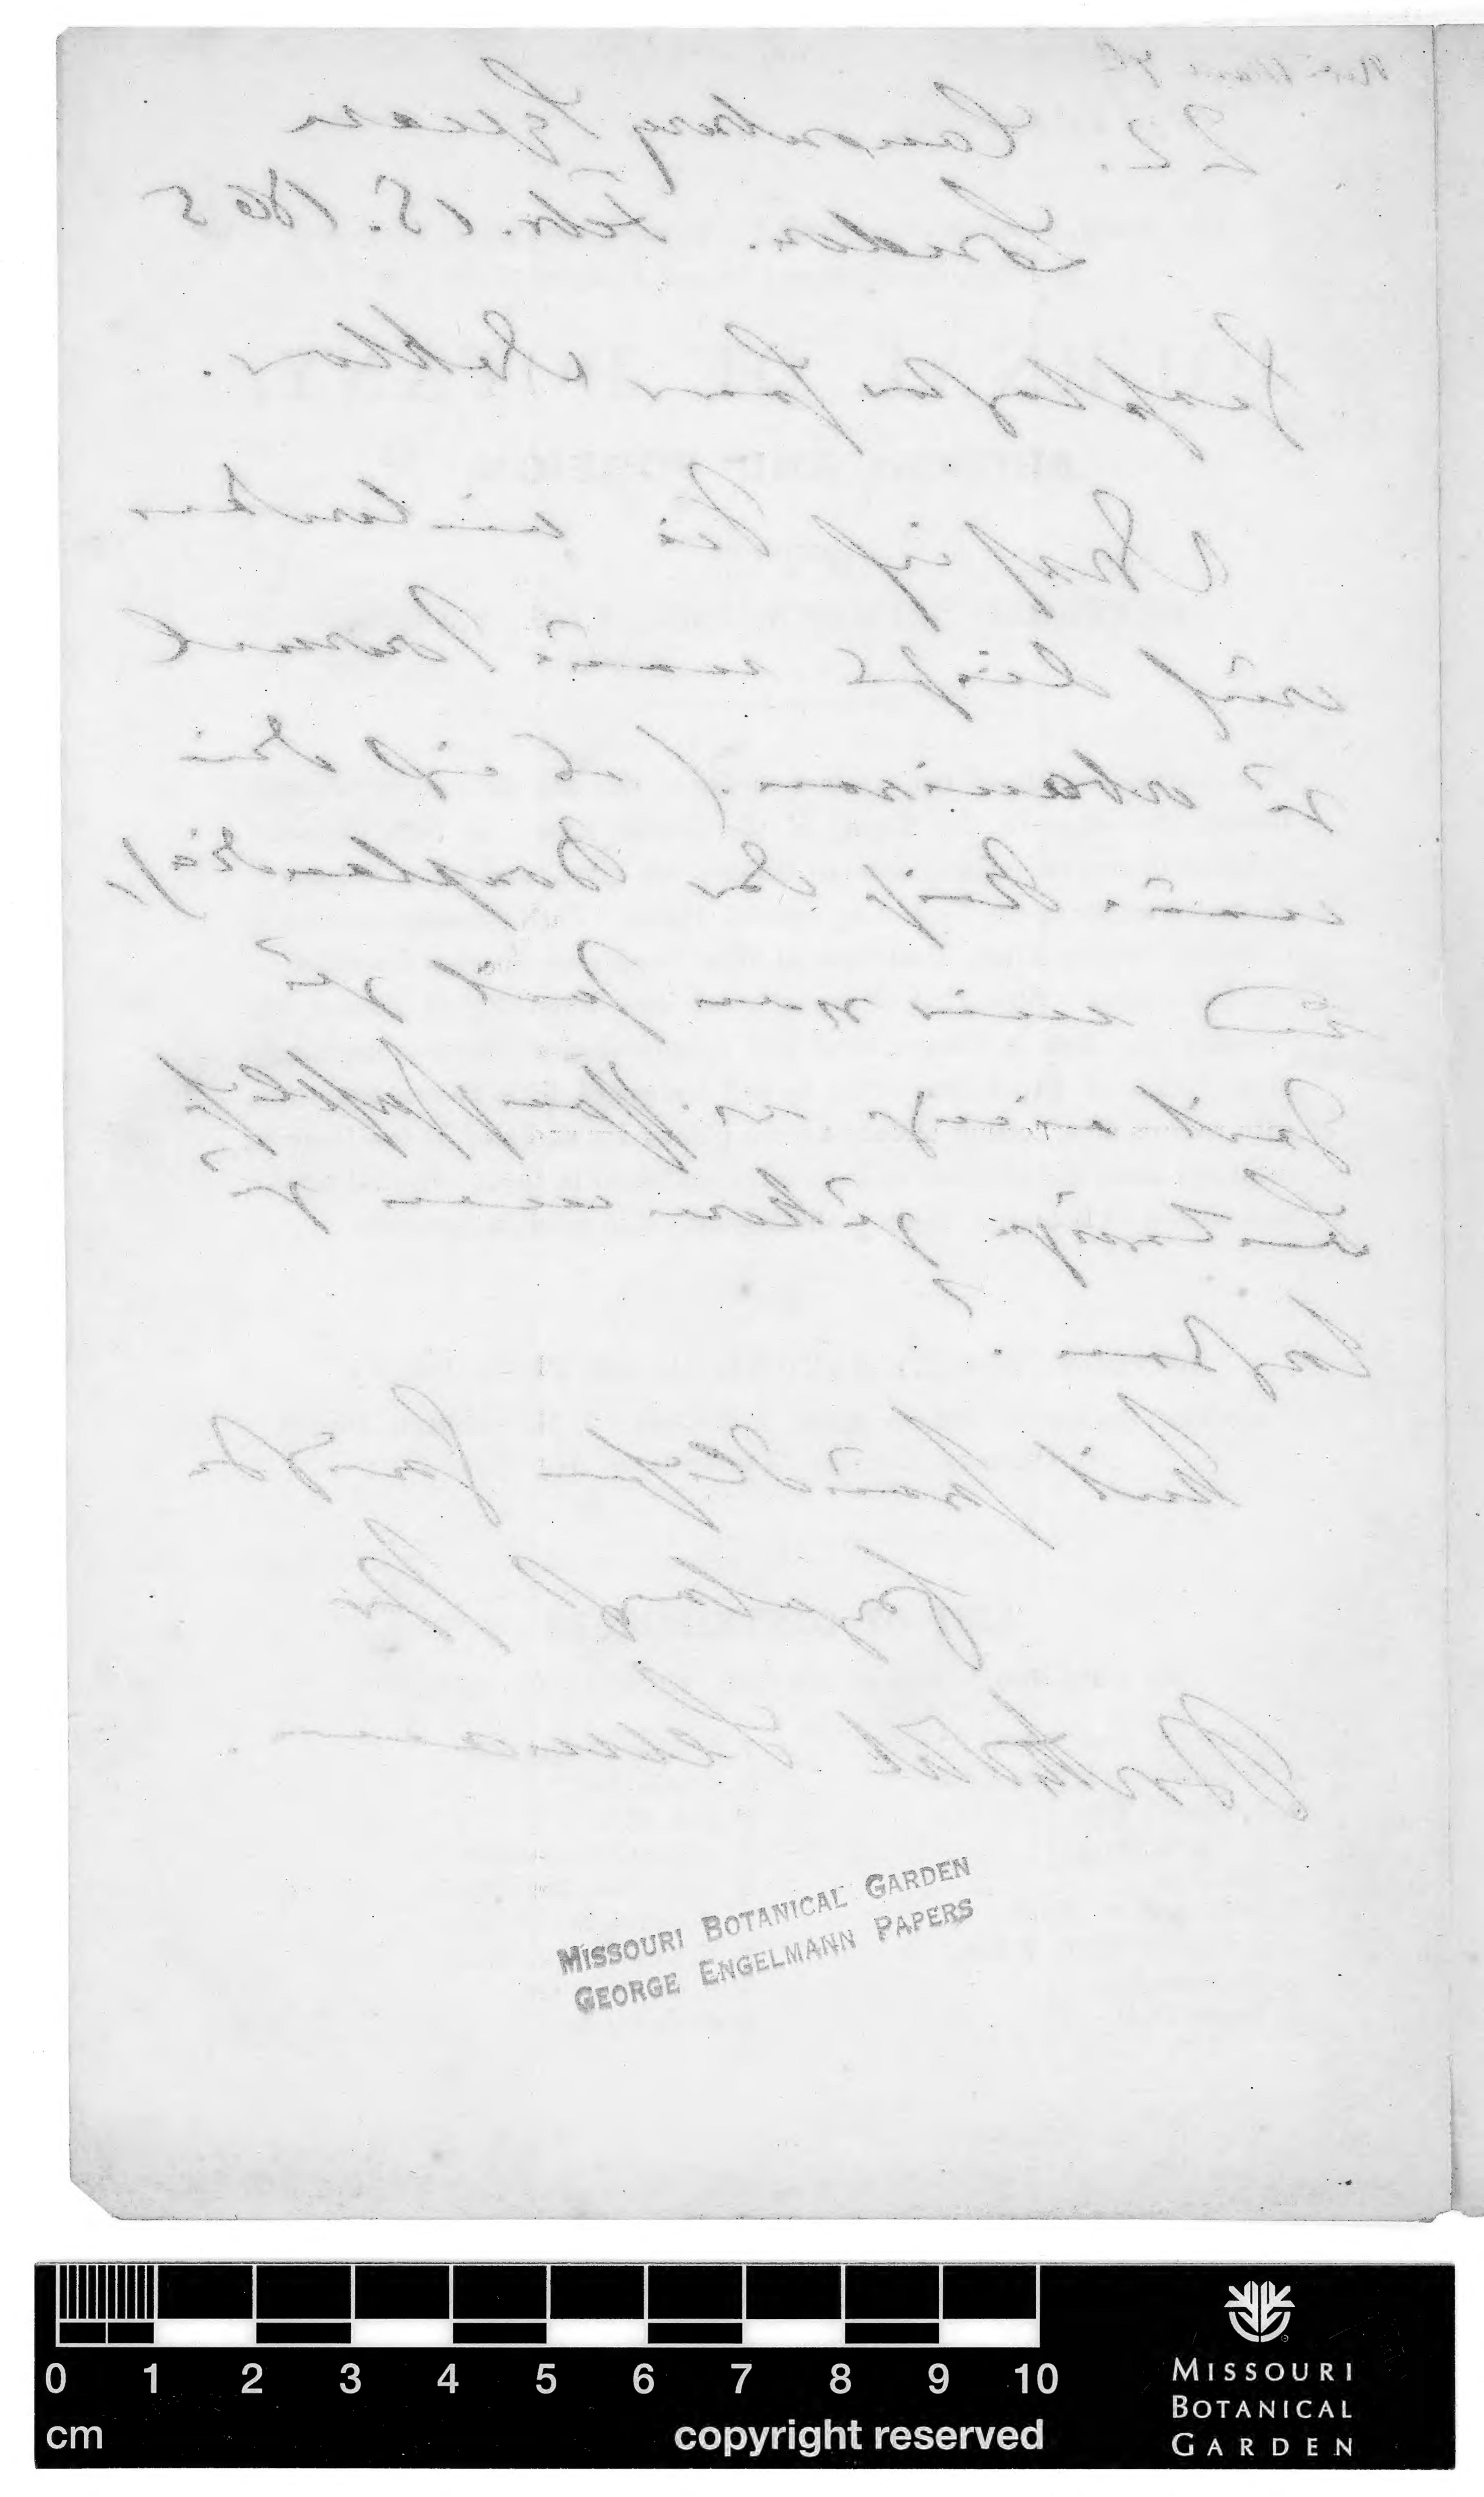

If you should have any other Bignoniaceae (could be almost any thing else, E.D.) and would send them to me in a box, they would be most welcome.

C. R. Markbam, Esq., F.R.C.E. F.L.S. J. T. Boswell Syme, May, F.L.S. THE Journal consists of two distinct sections: the one devoted to General Botany, the other to the Botany of the British Isles. In both divisions Original Papers on subjects new to Science are given, and when necessary, illustrated either in the Text or by Special Plates. Each number contains a Coloured Plate by Fitch, illustrative of New Genera or Species described in the letter-press. Structural, Morphological, and Physiological Botany are attended to. Nor is Geographical and Palæontological Botany neglected. Mere details of Excursions, either in well-known or little-known countries, with records of collecting already-known plants, are excluded, unless there is evidently some real addition to knowledge contained in them. Special attention is paid to Botanical News. Bibliography also receives attention.
